LEARNING

Unlock your protective security potential with our e-Learning and Digital Toolkit resources - Empowering you with comprehensive knowledge and access to assets to use in your organisation

NOTIFICATION

The National Counter Terrorism Security Office (NaCTSO) has withdrawn the ProtectUK App whilst it conducts a full review of the ProtectUK digital offering. We will be refreshing our Act Awareness e-Learning, and wider communications, to reflect this decision in the near future. Until then please disregard current references to the App in the ACT Awareness e-Learning packages and refer to the ProtectUK website (protectuk.police.uk) where you will find all the app content, including the Action Cards and Threat information etc.

If you have any further questions please contact NaCTSOmailbox-ProtectUK2@met.police.uk

e-Learning

Our counter terrorism e-Learning page offers online courses and educational resources to enhance knowledge and awareness on effectively countering terrorism and protective security enhancements.

Digital Toolkits

Our Digital Toolkits typically contain a range of resources and assets related to counter-terrorism, which businesses can download. These may include informative documents, social media guidelines, videos, infographics and more to enhance awareness, understanding, and preparedness in dealing with terrorism-related situations.

ACT in a BOX Exercises

Our interactive digital exercise enables businesses to rehearse and explore their response to a marauding attacker within the premises or area, and enhance their preparedness.

Education Learning and Guidance

The Department for Education have worked in collaboration with the National Counter Terrorism Security Office (NaCTSO) and sector partners to produce a range of free resources that can help all those working in education settings and relevant security leads to understand how to keep learners and staff safe from terrorism and other major incidents.
